HOW TO USE

1. **Download** the files. If you're on your phone: open the link, select each file, press Export, and click Save Image.

2. **Open** Adobe Photoshop then open your image. Select an overlay and place it on top of your image. (You can use more than one later)

3. **Adjust**/fit the overlay over your image using the left and right arrows. The overlay should cover your entire image.

4. Navigate to the **Layers** panel > click the popup box titled 'Normal'. This will show a list of different blending modes. 'Screen' works best for these. Hit the **Enter** key or click.

5. Time to **export** your image! Go to File > Export > then choose an export option. You're done
