2025-02-10 17:15:29 label 我要反馈 下载页面

This LUTS PACK contains 3 Original cinematic LUTS made by myself. Each of the footage is taken by HLG3 Using SONY A7III.

It functions on the HLG image profile regardless of which camera you're using. In Addition, It works on almost any editing application, which takes 3D LUT, for example, FCPX, PR, DaVinci Resolve, and so forth...

To Be Able to get the best outcome in my LUTs, I tremendously Urge you can fix the setting like mine and require a tool, color finale, Or another thing, to correct"Lift"Gamma" and"Gain"
