### Reallusion - Unreal Live Link Plugin:

The iClone Unreal Live Link Plug-in permits seamless integration between iClone and Unreal Engine for 3-D man or woman animation.

It simplifies the process of transferring characters, lighting fixtures, cameras, and animations without the want to guide FBX imports/exports. The plug-in automates character shaders and skeleton setup, bearing in mind real-time advent, animation, and visualization of digital people.

It gives intuitive tools for facial expressions and talking animations alongside multi-tool mocap recording, providing an efficient and streamlined workflow for 3-D man or woman animation in Unreal Engine.
