

Winsoft Linear Algebra v2.5 for Delphi & CB 5-12 Athens Full Source

2024-12-18 23:04:00 label 我要反馈 下载页面

is a comprehensive Delphi library tailored for linear algebra tasks, leveraging the optimized BLAS and LAPACK library provided by OpenBLAS. Designed for Windows platforms, it supports both 32-bit and 64-bit architectures. Compatible with Delphi versions 5 through 12 and Lazarus 3.0, it offers versatility across a range of development environments. The registered version grants access to the complete source code, enabling customization and transparency in implementation. Moreover, developers can integrate the library into their applications without any royalty fees, facilitating seamless distribution.

Key Features of Winsoft Linear Algebra :

- 1. Utilizes the optimized BLAS and LAPACK library from OpenBLAS for enhanced performance
- 2. Supports both Windows 32-bit and 64-bit architectures
- 3. Compatible with Delphi versions 5 through 12 and Lazarus 3.0
- 4. Includes full access to the source code in the registered version
- 5. Allows royalty-free distribution within applications
