[下载页面](#)

My personal LUT collection I employ all day long and on Cinema cameras that are digital.

In this download, you'll receive 10 custom LUTs which I've modified to suit specific scenarios of use.

These are not LUTs that are meant to be thrown onto footage immediately after shooting. I use them to make the right lighting and color decisions at the set or in the post to ensure that the desired images are preserved from beginning to end.

The custom LUTs included in this collection were designed to work with professional cameras and set-ups. Each LUT has been created to maximize the capabilities of the sensor in order to provide the highest quality images based on the conditions.
