Clear and detailed records

You can listen to the recordings of wall clocks that are grandfather-sized alarm clocks, desk clocks, pocket watches, and other tiny mechanisms, all meticulously edited and sounding natural. There are chimes of all kinds and bells, as well as that can be looped to tick at various speeds, precise gear mechanisms, and clockwork, along with rattling, clicking, snapping, and handling of spare components. All sounds were recorded in stereo and mono with the LCR recording technique.

One of the largest CLCK SOUND LIBRARIES

We spent significant time designing the library and recording sessions in the workshop of different clockmakers. This resulted in a collection of 440 sound files with more than 2300 individual sound files, making this library one of the largest clock libraries in the market.
