Aescript Real Ease v1.0:

Real Ease by Grape Design is a tool for creating physically accurate smooth animations with just one click.

It generates smooth animations by adding intermediate keyframes and focusing on acceleration and deceleration forces.

Key features include controlling animation speed, setting constant velocity motion, and providing smooth animation presets.

Users can easily copy and paste animation curves, add markers for peak speed and constant velocity times, and round keyframe times.

It supports animations with more than three keyframes and works with 1D, 2D, and 3D properties.
