

Hot4d v0.07 for Cinema 4D R25-S26

2025-02-10 16:44:17 [label](#) [我要反馈](#) [下载页面](#)

- HOT4D lets you create an Ocean that looks authentic.
- HOT means Houdini Ocean Toolkit. It's a plug-in for Houdini developed by Drew Whitehouse based on a Jerry Tessendorf paper.
- It lets you create the appearance of an ocean deep.
- I've decided to "copy/paste" the code to allow users of Cinema4D to access this program.
- The plug-in is in the beta stage. This means that the functions aren't implemented yet, or will soon be removed.
