

Social Titles Toolkit (Videohive 45697675) - AE Project

2025-02-10 17:00:12 label 我要反馈 下载页面

Social Titles Toolkit - AE Project VH-45697675: A new and innovative design to generate Box Titles. Entirely based on Text or font, there are no shape layers, no SourceRectAtTime Pre-comps, and no keyFrames are not required. Truly multi-line, fully modular. Duplicate the text layers within the same comp, and then create as many multi-line titles as you want.

Two easy setups and ten altered variations, each with additional options, features, and various animations. This includes two-layered boxes, duo-tone colored lines, Text, a word processor, and typewriter effects. All of them are responsive, dynamic, and self-resizing.

The design is adaptable, allowing it to fit any size screen. It is appropriate for short-form and social media video content (YouTube, Instagram, Facebook, TikTok, Snapchat, Twitter, Reddit, LinkedIn, Twitch, etc.). From instructional videos to explanations, You can utilize and modify the titles to suit any type of content, including news articles, videos as well as podcast subtitles for brand ambassadors that showcase blogs and vloggers, products on food, travel, fitness, and health, fashion, and beauty photography, lifestyle music, DIY technology, finance, business art and design, writing and books films, sports political, etc. This is ideal for online coaches creating training reels, captions for videos of short-duration reviews of products, or other things. The use of descriptive Text has been proven to boost the engagement of users, including shares, likes, and comments.

02 SIMPLE TITLES

- [Fixed]
- [Moving]

10 MODIFIED TITLES

- [Two Layered Boxes]
- [Duo Tone]
