KIT OPS PARALLAX is an addon for Blender 2.92+ that enables the creation of virtual rooms using a single plane, which can be viewed from various angles in real time, mimicking real 3D.

How to create 3D virtual rooms in Blender?

You can use "Blender Market - Kit Ops Parallax" to design your project.

Utilizing KIT OPS 2 PRO is recommended for efficient material and plane management. The product includes over 60 Loft-themed assets in a KPACK, allowing users to quickly build parallax 3D room objects.
