Unreal Engine - Planets Generator v5.3:

Product Description:

Included in the package are blueprints for both a planet maker and a starry sky setup, providing users with comprehensive tools to craft their own unique celestial bodies and environments.

With over 45 customization options available, users can effortlessly create a diverse array of planets. Adjustments can be made to ocean properties, icing formations, surface characteristics, atmosphere colors, and even the presence of orbital rings, resulting in high-quality, personalized planets with minimal effort.

The rotation speed of the planet can be finely tuned to suit the desired aesthetic or gameplay requirements.

Documentation:

Technical Details: Resources Utilized:

- Textures: 10
- Meshes: 2
- Materials: 4
- Material Functions: 3
- Blueprints: 2

This product empowers users to unleash their creativity and design stunning celestial bodies and accompanying environments with ease, thanks to its intuitive customization options and comprehensive documentation.
