

CData Drivers for Google Spanner v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:04:30 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for Google Spanner enable seamless integration with various data processes. These bi-directional data drivers empower users to connect live Google Spanner databases with BI, analytics, reporting tools, and custom solutions. Offering support for ODBC, JDBC, ADO.NET, and wire-protocol interfaces, these drivers ensure compatibility with diverse database management applications, allowing for efficient and straightforward data connectivity.

provide a host of BI and analytics integration features, facilitating fast and easy connectivity to real-time Google Spanner data. Users can enhance their data visualization and reporting capabilities with unparalleled query performance and seamless integration with popular analytics tools. Additionally, CData's solutions extend to ETL, replication, and warehousing processes, providing robust, reliable, and secure data movement. These drivers streamline operational reporting and data warehousing efforts by supporting data governance initiatives, improving query performance, and enabling disaster recovery capabilities.

CData's offerings also cater to developers, providing tools that simplify integration with Google Spanner. The data-centric model offered by their Google Spanner drivers accelerates application development, allowing developers to build higher-quality applications faster than ever. Furthermore, the drivers introduce a virtual database abstraction layer on top of Google Spanner data, supporting advanced data virtualization features like query federation, delegation, and predicate pushdown. This enhances flexibility and optimization in data retrieval processes, making **CData Drivers for Google Spanner** a comprehensive solution for diverse data management needs.

This package includes the following components:

- Excel Add-In for Google Spanner
- Google Spanner ADO.NET Provider
- Google Spanner BizTalk Adapter
- Google Spanner Data Cmdlets
- Google Spanner FireDAC Components
- Google Spanner JDBC Driver
- Google Spanner MuleSoft Connector
- Google Spanner ODBC Driver
- Google Spanner Power BI Connector
- Google Spanner SSIS Components
- Google Spanner Tableau Connector

Key Features of CData Drivers for Google Spanner :

1. Fast and easy connectivity to real-time Google Spanner data.
2. Unmatched query performance for BI, analytics, reporting, and data visualization technologies.
3. Seamless integration with popular analytics tools.
4. Extension of favorite ETL tools with Google Spanner connectivity.
5. Robust, reliable, and secure data movement for ETL/ELT processes.
6. Support for replication, data warehousing, and operational reporting.
7. Improved query performance, supporting data governance initiatives.
8. Support for popular database protocols: ODBC, JDBC, ADO.NET.
9. Compatibility with wire-protocol interfaces for SQL Server and MySQL.
10. Easy connection and management of Google Spanner data from a wide range of database management applications.
11. Seamless connection to Google Spanner from data migration, ESB, iPaaS, and BPM tools.
12. Straightforward access from applications like BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, and more.
13. Data-centric model for Google Spanner simplifying integration.
14. Acceleration of application development for developers.
15. Integration with popular developer tools and technologies.
16. Virtual database abstraction layer on top of Google Spanner data.
17. Support for advanced data virtualization features, including query federation, delegation, and predicate pushdown.
18. Increased flexibility and optimization in data retrieval processes.
