Monochrome Lightroom Presets - 281305110:

The **Monochrome Lightroom Presets** collection features six distinct black-and-white presets designed to improve portrait photography by adding fine grain and dramatic tones, inspired by classic 35mm film.

These presets are compatible with Lightroom for both desktop and mobile, as well as Photoshop using Adobe Camera Raw, and work on both PC and Mac.

They are ideal for enhancing portraits, fashion photography, fine art, and social media content.
