What are 130 LUTs and Presets?

A collection of "130 LUTs and Presets" typically refers to a package or set of 130 pre-configured color grading and editing settings that can be applied to images or videos using various editing software, such as Adobe Lightroom, Adobe Premiere Pro, Photoshop, or other similar applications.

Having a collection of 130 LUTs and presets provides a wide range of creative options for enhancing and stylizing your media content. Users can apply these presets and LUTs to their projects to achieve different visual effects, color grades, or styles without the need to manually adjust every parameter.
