2. On the Lumetri panel, select the Lumetri panel, and click on the Basic Correction tab.

3. In Basic Correction click the input LUT dropdown menu and then click the Browse button.

4. Select a LUT from the downloaded files.

What is HDR Looks – LUTs Pack?

"HDR Looks – LUTs Pack" likely refers to a collection of LUTs (Look-Up Tables) designed to enhance and apply High Dynamic Range (HDR) looks to your videos or photos. LUTs are used in video and photo editing to apply color grading and styling to achieve a particular visual aesthetic.

HDR typically involves capturing a broader range of brightness and color information in an image or video, which can result in vivid and visually striking content. HDR LUTs can help you achieve that HDR look by adjusting the contrast, color balance, and other visual elements in your media.

These LUTs can be applied using various video editing software or photo editing applications that support LUTs, such as Adobe Premiere Pro, Final Cut Pro, DaVinci Resolve, Adobe Photoshop, and more. You load the LUT file into your editing software and apply it to your footage or images to achieve the desired HDR effect.
