Photoshop actions configuration.

It is important that you only use the English version of Photoshop. Each action was optimized to be used with the English edition of Photoshop.

Use the RGB Mode with 8 bits color. These settings are available by visiting Image->Mode.

Make sure that the option "Add Copy" to copied layers or groups is turned on. This option is only available in Photoshop CS5 and later. Click on "LAYERS" and then go to "Panel Options ...", Make sure "Add a Copy" to Copied Layers and Groups is turned on.

Use 72dpi resolution and higher. If your photo is less than 72dpi, the action will not work. You can fix this by going to Image->Image Size and increasing the resolution.

How can I combine my actions?

1. Open your photo
2. Play is the first thing you do.
3. Save the image to a PDF
4. Save the image you have already saved.
5. Now, the second action is available
