CM 545127 – Cine Collection – Lightroom Presets: Cine Collection Cine Collection is an extremely powerful set that includes Adobe Lightroom presets that are designed to mimic Hollywood Movie style Color Grades which are distinguished with warm skin tone tones of orange as well as dark shadows of cold green/teal, all while maintaining their blacks that are heavy and unsaturated. We've revamped the collection from scratch using feedback from our customers to enhance the quality and experience when using the presets. The presets can now be used on a larger selection of images and have higher accuracy.

We've taken the core principles from the Cine Collection (Teals/Greens and Orange) and improved the use of split toning as well as the channel saturation, and toning to make presets that can be applied for a greater variety of images and with more precision. We've retained the core workflow elements such as setting the white balance before applying a preset you like before adjusting temperatures (slider) to get the most accurate skin color.

These presets are ideal for street fashion, lifestyle, and fashion photography in addition to photographs taken in urban or "grey" like locations.

- Adobe Lightroom 4, 5, 6 & CC.
- Full-customizable simply applies the desired preset and alters settings according to your needs.
- Compatibility with Windows PC and Mac.
- Use using Raw images or JPEG images.

Included:

- 20 Lightroom Presets
- Instruction Manual
