The Cine Pack Video LUTs by Martin Timmer: Cine Pack Video LUTs are the ideal collection of video filters for editing your adventure and natural footage. Martin's unique editing style can help you enhance raw footage and bring them to life.

My LUTs support the most recent technologies, such as 10 bit video, 4:22:00 chroma sampling and 4k high dynamic range. My colors will be more optimized the better quality video you shoot. You can sometimes use them again if the video isn't as saturated. Or you can use multiple LUTs for the same video.

Gfx plugin details of The Cine Pack Video LUTs by Martin Timmer

The product is in the **After Effects category**, for more information about this post you can click on the home page link in the sidebar.

To search for similar products to The Cine Pack Video LUTs by Martin Timmer,

This LUT can only be used for Rec.709 footage. Use a dedicated gamma curve such as Slog3 for Sony cameras. Apply the Slog3 Gamma Log LUT and then apply my color LUT. You will get the best out of your footage using my amazing color changer LUTs.
