To search for similar products to Aescripts AE Global Renamer 2 v2.3.8 ,

**Does this product work on Windowns and Mac Os?** We mostly include the operating system in the title. if it is not written, it will work on Windows, and you can    for the Mac version.

### Rename anything!

- Project panel item names
- Names of Layers
- Names of effects
- Text and Text Layers
- Comp Marker and Layer
- Expressions
- Names of properties along with Children (Masks, Puppet Pins, Shape Layer properties, etc.)
- Render queue footage paths

### Special replace keywords:

- **[layername]** - will insert the layer name
- **[layerindex]** - will insert the layer index. Tip: adding zeroes will pad [000layerindex] = 001,002, etc
- **[layercomment]** - will insert the layer comment
- **[layer#name]** - will insert the name of the layer # indicated. To insert the name of layer 5: [layer5name]
- **[compname]** - will insert the comp name
- **[projectname]** - will insert the project name
- **[date: E MMM dd, yyyy hh: mm a]** - will insert the current date and time; this field uses the JavascriptToolbox.com date function, which can be further customized.
- **[num=##,inc=##]** - will insert a sequential padded number and increment by the optional inc; numbers can be negative, add leading zeros to pad.  
For example: [num=005,inc=-10] will start numbering at 15 and increase (decrease really) by -10 with 3 number padding: 015, 005, -005, etc

### New Changes:

- Fixed macOS Monterey crashing bug
- Improved support and better error messaging for online activation
- Fixed 'ExtComms' error handling
- Improved folder handling to avoid Dropbox error on macOS all together
- Super small user interface. Dock it anywhere!
- Save presets to save
