

### 3D Earth Route (Videohive 35521921) - AE Project

2025-02-10 16:59:12 label 我要反馈 下载页面

**3D Earth Route (Videohive 35521921) - AE Project:** D Earth Route is a template designed for After Effects cc2018 and above built on a design and a script to build your own custom route using the 3D Earth.

By using 3D Earth Route you can design as many stop-points as you'd like, and then choose the time for each.

The process is easy and you can design your own animation in a quick time: Simply create your path and alter the path's position points by using the geocode feature. So, you just need to type in the names of the city on the map where the points need to be placed, and the script will move them to the correct location.

Then you must decide on the stop points and the time of travel.

It's time to put elements on your Earth.

### Gfx plugin details of 3D Earth Route (Videohive 35521921) - AE Project

The product is in the **After Effects Project** category from **VIDEOHIVE**, for more information about this post you can click on the home page link in the sidebar.
