- Wobble Shake (x15)
- Rotation Shake (x15)
- PNG Animation
- PNG Drop Shadow
- Transform (Motion Blur)
- 3D Animations (x4)
- Nudges (x8)
- Sways L+R (x6)
- Movement (x10)
- Slides (x20)
- Misc
- Intro Shakes (x8)
- Stretch Effect (x7)

and 3 PNG Characters that you can insert your head inside (to apply then the presets too).

With this Pack, you'll be able quickly to make animations that are like those you see in videos by TommyInnit (or virtually any other YouTuber in Minecraft). )...

This Pack contains one variant of the preset packs; particular intro shakes might not function intended to be on Premiere versions before 2022.

The process of installing your presets is simple.

- Download your presets from the confirmation emails (they will be contained in the form of a .zip file) Save them in a place that is easy for you to access.
- You can go to the location you stored the .zip file, and double-click the .zip.
- When you are in your .zip file, you'll find the Terms of Use as well as the.PRFPSET file.
- Move the.PRFPSET file from the .zip folder to a new place. When it's removed from the .zip file, it will open the preset.
- Open Premiere Pro and then go into the effects section. If you are unable to find an effects section, simply click "Window", then turn on the effects tab
- In the effects tab, click right-click in the section 'presets. You'll see an option to import presets. Select 'Import Presets' and then locate the location in which you downloaded your presets.
- Double-click to open the.PRFPSET file and the import should be completed. Now you should find yours presets in the preset folder of Premiere Pro!
