Aescripts Match v0.0.1:

Match is a specialized extension for After Effects, aimed at enhancing the management of expressions and scripting tasks.

It caters to both seasoned users and beginners, offering features like simplified property path retrieval, robust error handling, and real-time expression formatting.

Compatible with all After Effects property types, Match includes pre-built easing functions for seamless animation adjustments.

Moreover, it facilitates the conversion of expressions into keyframes for improved playback efficiency.

Its user-friendly interface, complete with resizable options, ensures accessibility and efficiency for expression enthusiasts and script creators alike within the After Effects environment.
