PhotosRevive v2.1.7 (Mac):

PhotosRevive is an advanced tool that automatically colorizes black-and-white photos using cutting-edge AI technology.

It offers both automatic and manual modes for color restoration, allowing users to enhance photos with or without technical expertise.

The Mac version features a color indication tool to refine AI results.

PhotosRevive operates offline, ensuring privacy and security.

It includes a Photos extension for quick edits and supports seamless integration with iPhone and iPad for scanning and importing vintage photos.

Available across Mac, iPhone, and iPad, the app provides a universal license, eliminating the need for multiple purchases.
