Winsoft NFC Library for Android is a comprehensive solution designed specifically for Delphi and C++ Builder developers seeking to incorporate NFC functionality into their Android applications. Leveraging the Android NFC API, this library facilitates seamless reading, writing, and formatting of NFC tags, providing robust support for various tag types, including ISO-DEP, NDEF, NFC-A, NFC-B, NFC-F, NFC-V, MIFARE Classic, and MIFARE Ultralight.

Developers can utilize the to enable Android Beam data transfer, foreground dispatch, reader mode, and host-based card emulation, empowering their applications with advanced NFC capabilities. Compatible with Delphi/C++ Builder versions 10.4 through 12, this library ensures optimal integration across different development environments.

With royalty-free distribution rights in applications and source code included in the registered version, the **Winsoft NFC Library for Android** offers flexibility and accessibility for developers looking to enhance their Android applications with NFC functionality. Whether for reading NFC tags, implementing data transfer, or simulating card emulation, this library provides a reliable and efficient solution for NFC integration in Delphi and C++ Builder applications on the Android platform.

Key Features of **Winsoft NFC Library for Android** :

1. Utilizes Android NFC API for seamless integration
2. Enables reading, writing, and formatting of NFC tags
3. Supports Android Beam data transfer
4. Facilitates foreground dispatch and reader mode
5. Allows for host-based card emulation
6. Supports various tag types, including ISO-DEP, NDEF, NFC-A, NFC-B, NFC-F, NFC-V, MIFARE Classic, and MIFARE Ultralight
7. Compatible with Delphi/C++ Builder 10.4 - 12
8. Includes royalty-free distribution rights in applications
9. Source code included in the registered version for customization and flexibility
