What is Portrait presets?

Portrait presets in Lightroom are pre-defined sets of adjustments that can be applied to portrait photographs with a single click. These presets are designed to enhance and stylize portrait images by adjusting settings such as color tones, contrast, sharpness, and other elements.

Keep in mind that the effectiveness of portrait presets can vary based on the lighting conditions, the original photo's characteristics, and your personal preferences. Always check any accompanying documentation for specific instructions provided by the preset creator.
