DVLOP – RGB by Shortstache:

This pack is specifically designed to work best in warmer environments (red) as well as a green and neutral scene (green) and lastly more COOL and less sweltering environments (blue). This is why it's called RGB. These presets provide flexibility and multiple functions, offer a cinematic tone, and help stylize your photos.

Includes:

- **COOLITH** Its Coolith presets are bursting with undertone and color. They can improve your photos' blues, modify or reduce them completely. They provide a variety of uses that can be applied to virtually any picture. It doesn't matter what it is, if it's a "cool" image, these preset can be applied to it without limiting you in any way!
- **Greenith:** The Greenith presets stand as a neutral platform among the other two presets of this pack. A wide range of use and overall a dark cinematic tone. These preset focus on altering the hue of green to adjust them or down or change in overall color. Such a quick fix to dial in greens!
- **WARMITH**The Warmith sets are created to give you a bit more flair. Warmer undertones and rich colors create a balance between cool and warm. They give a vintage but modern and sleek style to improve your photographs. There are many possibilities for use, especially for neutral portraits.
- **Stache:** (Blue Down, Heat Shift, Sage, Warmither, Warmith-Less)
