

## AEInfoGraphics v2.0.3+ Activation Keys

2025-02-10 17:12:44    [label](#)    [我要反馈](#)    [下载页面](#)

Create Superbly animated infographic Graphs in the connected Spreadsheet or directly input data with real-time previews.

**AEInfoGraphics** is an AfterEffects extension that converts your Information into astonishing and gorgeous chart cartoons. It permits you to import CSV files straight to After Effects. It is also possible to make your tables at AE utilizing AEInfoGraphics's simple to use interface. Select from twelve amazing chart templates to create your graph composition. That's all! Your graph cartoon is about to work with!

- **Preview Feature:** A strong preview feature includes this new edition. It is possible to readily view your outcome before making it.
- **Multiple Data Records:** For the chosen charts there are multiple data collection services. You can now compare two sets of information in one chart.
- **Time:** Cartoon and Composition durations could be put.
- **Labeling:** You can set the tag type shown on graphs (percentages or values )
- **Save Choice:** you're able to save your information in addition to all of your settings. It's possible to load them anytime you would like.

### Very Simple to Use

View Video tutorials by clicking the VIDEOS tab over

#### Step 1: Develop Info

There are two approaches to generate info with AEInfoGraphics. You can import CSV files straight to After Effects or you may make your table by using the AEInfoGraphics interface. In any event, you'll have the ability to see your information recorded in the AEInfoGraphics panel.

#### Step 2: Pick Your Column

If you Select the first manner, you need to Pick the data Pillar (s) out of"Pick Data" situated in the top right corner.

#### Step 3: Arrange Data

You're able to edit your information by adding, removing, or reordering items. It's possible to directly edit names and worth by simply clicking them.

#### Step 4: Pick Your Template

There are twelve distinct forms of graph templates. Some of Them let you utilize several data collections. It's possible to observe those templates in action together with all the new preview feature to choose the most suitable one for the own data. (Four graph templates don't have any preview attribute!)

#### Measure 5: Putting and Preview

In this modal perspective, you will find fundamental settings, information columns record, Templates, and themes. You will find 9 lovely color motif. These may also be previewed in the preview display. You're able to determine cartoon and makeup durations and pick an alternative for tags (Value or Percentage).
