

CData Drivers for GitHub v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:04:45 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for GitHub facilitates effortless integration with GitHub, offering a bi-directional solution for reading, writing, and updating data. The drivers are designed to seamlessly connect GitHub data with a wide array of applications, including BI, analytics, reporting, and ETL tools. With unparalleled query performance and comprehensive access to real-time GitHub data, users can make informed decisions and enhance their decision-making processes. These drivers also extend to ETL, replication, and warehousing, ensuring robust, secure data movement for various needs, such as operational reporting and performance optimization of data warehouses.

In addition to supporting popular database protocols like ODBC, JDBC, and ADO.NET, CData's drivers provide accessibility to GitHub data from diverse database management applications, simplifying data management tasks. The integration seamlessly extends to workflow and automation tools, enabling smooth connections with data migration, ESB, iPaaS, and BPM tools. Whether using BizTalk, MuleSoft, SQL SSIS, Microsoft Flow, Power Apps, Talend, or other applications, **CData Drivers for GitHub** ensure straightforward access to GitHub data, streamlining the integration process for developers and organizations. Finally, offers a data-centric model, empowering developers to accelerate development and build high-quality applications efficiently.

This package includes the following components:

- Excel Add-In for GitHub
- GitHub ADO.NET Provider
- GitHub BizTalk Adapter
- GitHub Data Cmdlets
- GitHub FireDAC Components
- GitHub JDBC Driver
- GitHub MuleSoft Connector
- GitHub ODBC Driver

Key Features of CData Drivers for GitHub :

1. Bi-Directional Data Integration
2. Versatile Connectivity
3. Real-time Access
4. BI & Analytics Integration
5. ETL, Replication & Warehousing
6. Data Management
7. Workflow & Automation Tools Integration
8. Developer Tools & Technologies
9. Data Virtualization
