Light Leak Overlay Toolkit is a versatile tool designed to enhance visual storytelling by adding the enchanting effects of light leaks, bokeh, and subtle glow to ordinary scenes.

How to design your project using tools and adding light leak effects and subtle glows?

You can use the "Light Leak Overlay Toolkit" to design your project in After Effects.

Compatible with Adobe After Effects and Premiere Pro, it offers a range of features including customizable light leaks, bokeh controls, and support for various aspect ratios. With no need for additional plugins, users can effortlessly create captivating visual effects to elevate their projects. Whether transforming everyday moments into ethereal memories or turning scenes into artistic masterpieces, this toolkit provides unlimited creative possibilities.

Package information

The content was last updated on June 3, 2024, and published on the same day. It includes After Effects project files and Motion Graphics Template files compatible with After Effects CC. Universal Expressions are supported, and the resolution is resizable.
