Articulated Sounds – Yeti Monster: The "Yeti Monster" library is a large collection of humanoid rare creature sounds. They were meticulously recorded, edited, and then classified and then meticulously meta tagged. It is a collection of cinematic sounds that include more than 25 distinct kinds of articulations, actions and reactions, and cartoon-like interpretations.

More than 10 actual voices were recorded by this library. The innovative Sanken Co 100K microphone has captured an amazingly wide frequency range, reaching 100KHz. This allows for more processing and pitching of the signal while maintaining its true characteristic! The result is stunning. real-life sounds of apes that can surely add value to your project.

These sounds are great for bigfoots, yetis, and as well for all humanoid or Ape-like creatures! The sound is available in 192Khz. This allows for more pitching and treatment.

- 247 Epic humanoid creature sounds designed
- 25+ different kinds of articulations emotions and reactions such as gasp, breath, grunt, snore, growl motion, mumble footstep, roar ...
- Included 53 additional Cartoon-like videos of funny, friendly monsters.
- High sample rate sounds at 192 KHz recording and processing
- A well-organized editing process and ample metadata, ready-to-use sounds
