Borrowed from blueprint scrolls, and the exactness of pencil-constructed forms constructed in architect albums. What if a simple style could be transformed into something more fun? It will be able to create an image effect that is both chaotic and orderly, but it won't look as strict as watercolor.

You can make your photos of interiors and buildings unique! You still have a lot of fun with the effect! **10 duotone overlays** See which of the following can be added to the mix?

What's in your heart?

- PSD mockup easily editable
- 4500x3000 pixels, 300 dpi
- 10 duotone overlays;
- Help file
