

Blender Market - BlenderRef v1.1

2025-02-10 16:45:17 label 我要反馈 下载页面

Blender Market - BlenderRef v1.1: Introducing BlendRef, the essential Blender add-on for managing images and video references directly within the viewport, seamlessly integrating with your sculpting, animation, or modelling workflow. Similar to popular standalone apps like BeeRef or PureRef, BlendRef simplifies your workflow by eliminating the need for external applications cluttering your workspace. With BlendRef, you stay within the Blender interface, effortlessly managing references without interruptions.

- Simple import: Choose a folder or individual image to import into your Blender project.
- Arrange images in columns: Organize your references with ease for quick access.
- Flip horizontally or vertically: Adjust images to suit your needs without leaving Blender.
- Rotate and scale: Fine-tune your references directly within the viewport.
- Efficient video reference handling: Loop and slow down segments for precise animation reference.
- Add text: Enhance organization by adding text to your references.
- Seamless collection management: All references are stored in specific collections, facilitating easy transfer between Blender files via collection appending. BlendRef streamlines your workflow, making it easy to manage references while keeping your focus within the Blender interface.
