What is Analogica Lab CINESTILL 800T Power Grade

"Analogica Lab CINESTILL 800T Power Grade" likely refers to a specific color grading or color correction process applied to CineStill 800T film by Analogica Lab.

Color grading or correction is crucial in post-production for film and digital video. It involves adjusting the colors, tones, and overall look of footage to achieve a desired aesthetic or mood. When applied to film, this can be particularly important to ensure consistency and enhance the cinematic qualities of the footage.

"Analogica Lab" may be a lab or studio specializing in film processing and color grading services. It's possible that they have developed a specific Power Grade preset for CineStill 800T film to achieve a particular look or aesthetic when working with this film stock.
