

## Grid Based Beats Textures Drones and SFX WAV

2025-02-10 17:12:59    [label](#)    [我要反馈](#)    [下载页面](#)

Textures Drones and SFX includes 34 Drones and Sound Effects specifically designed for game and cinematic sound applications. All of the samples were developed with a modular synthesizer using patches that were primarily concentrated on modulation and different clock functions.

All drones were synced to an average of 125 BPM and span from four to forty measures in order to allow the modulation to develop. Because the drones sync and synchronized, they could be suitable to use for in music that is electronic.

Music is Grid-Based Beats
