Aescripts Essential Namer v2.3 (Win, Mac)

2025-02-10 17:06:28　　label 我要反馈　　下载页面

Aescripts Essential Namer v2.3 (Win, Mac) is an After Effects plugin designed to streamline the inclusion of commonly used layer properties into the Essential Graphics Panel (EGP) without navigating active compositions.

How to make changes in the layers such as naming the layer and adding text?

You can use "Aescripts Essential Namer".

New features include customizable layer naming, quick addition of text sources, and the ability to create custom prefixes.
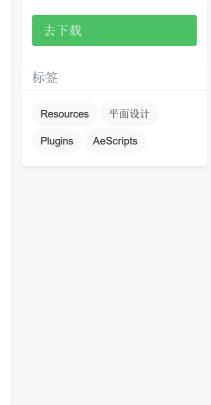

The update also supports position-separate dimensions and 3D layer transform properties.

"Aescripts Essential Namer" Samples:

Essential Namer 2 allows easy addition of properties like anchor points, position, scale, rotation, and opacity to the EGP.

The plugin's compact interface fits seamlessly into any workspace, enhancing usability.
