

CData Drivers for OneNote v24.0.9060 (21 Oct 2024) All Platforms + License Key

2024-12-18 23:04:15 [label](#) [我要反馈](#) [下载页面](#)

CData Drivers for OneNote offers seamless integration with Microsoft OneNote data, facilitating effortless connectivity for BI, reporting, analytics, and custom solutions. With these bi-directional drivers, accessing live OneNote data becomes effortless, empowering users to leverage real-time insights and streamline data workflows across various applications.

For BI and analytics, provide unparalleled query performance and comprehensive access to OneNote data and metadata, seamlessly integrating with popular analytics tools. Additionally, they extend ETL tools with OneNote connectivity, enabling robust, reliable, and secure data movement for replication, warehousing, and data management purposes.

Supporting widely-used database protocols such as ODBC, JDBC, and ADO.NET, as well as wire-protocol interfaces for SQL Server and MySQL, **CData Drivers for OneNote** facilitate easy connection to and management of OneNote data from various database management applications. Moreover, they seamlessly integrate with workflow and automation tools, simplifying data migration, ESB, iPaaS, and BPM processes.

This package includes the following components:

- Excel Add-In for OneNote
- OneNote ADO.NET Provider
- OneNote BizTalk Adapter
- OneNote Data Cmdlets
- OneNote FireDAC Components
- OneNote JDBC Driver
- OneNote MuleSoft Connector
- OneNote ODBC Driver

- OneNote Tableau Connector

Key Features of CData Drivers for OneNote :

1. Seamless integration with Microsoft OneNote data
2. Effortless connectivity for BI, reporting, analytics, and custom solutions
3. Bi-directional drivers for accessing live OneNote data
4. Real-time insights and streamlined data workflows
5. Unparalleled query performance
6. Comprehensive access to OneNote data and metadata
7. Integration with popular analytics tools
8. Extension of ETL tools with OneNote connectivity
9. Robust, reliable, and secure data movement
10. Supporting ODBC, JDBC, and ADO.NET protocols
11. Wire-protocol interfaces for SQL Server and MySQL
12. Easy connection and management of OneNote data
13. Integration with workflow and automation tools
14. Simplification of data migration processes
15. Support for ESB, iPaaS, and BPM processes
16. Streamlined development of high-quality applications
17. Data virtualization capabilities
18. Abstracting OneNote data into a virtual database
19. Advanced features like query federation and predicate pushdown
