This action makes your photos professional-looking. There are many layers that you can use to modify your results. This action is tested on Photoshop (English Version Only) CS3, CS4, CS5, CS6, CC. The action will not work on other versions of Photoshop.

For the best results, I recommend that you use this action with high-resolution photos. High-resolution photos should be between 2500px and 3500px to get the best results. The ideal range is between 3000px and 3500px. The effects created by the actions will have a smaller effect on your photo, so the preview images are not included.

Cracked Stone Photoshop Action Vol 3
