**Kinema Sounds Djembe:** Experience a collection of 162 loops meticulously crafted at various BPMs, including 80, 90, 100, 110, 120, 130, 140, and 150.

These loops were expertly recorded in Kinema Audio's remarkable Studio 2, a space that was once a cinema auditorium. The recording process involved a C414 BULS pair captured through Neve 1073 Preamps, along with punchy Dynamics (MD421, EV20, and AudioD6) recorded through API 3214MB Preamps.

The loops, performed by Richard Kensington, showcase exceptional tone and expression, providing an incredible sonic experience for your creative endeavors.
