Gradient Animation: for Text & Logo Animations in After Effects

2025-02-10 17:12:29　　label 我要反馈　　下载页面

Gradient Animation: for Text & Logo Animations: In this course, I'll teach you how to create and animate these animated gradient effects and later add a text animation to them in After Effects.

In the future, you can use these Gradient Effects to create your Logo Animation, Character Animation, and Web and UI design and Animation projects.

This course is designed for those with a basic understanding of After Effects. We'll begin by creating a basic gradient animation using shapes and one color hue.

Then, we'll build on this essential base by adding effects of various animation layers and quickly incorporating various colors that work together. Then I'll teach you how to make the animation of a text message which is also quickly revealed through those same colors.

Finally, I'll teach you how to create an entirely different wavy gradient and text animation design from the similar project. In addition, to make it even more appealing, I'll also show you many other ways to modify this gradient's design and animation to create various styles that can be used in various distinctive projects.

I have also included the project files and an exercise task for you to complete, where you'll need to play with the effects of gradients until you get some fantastic results. After you've completed the project, you are free to share these with me, and I'm interested to see what ideas you think of!

Additionally, I'll be there to help. If you're lost and need help, drop me an email under the Discussions Section', and I'll return your message.

In the end, it's an excellent option to improve your gradients and animations using Adobe After Effects, regardless of whether you're a Student Illustrator, Animator or Hobbyist. Artist, or simply an enthralled creative person!
