- An assortment of twelve original coarse brushes designed for Procreate that can be used for shading and adding texture to your sketches!
- You will receive a ZIP that contains the 12 brushes with the 12 brushes in .brushset format, as well as a JPG Swatches Sheet.

To make use of these brushes, you'll require:

- The iPad Procreate app is available for iPad. (the brushes **only** be used in Procreate)
- An iPad with a stylus is recommended, Although the brushes are compatible with other iPad models as well as third-party styluses, I would recommend an **iPad Pro + Apple Pencil** combination, since they're the current most precise and precise tools to draw with Procreate. The brushes were designed and test-tested with an Apple Pencil, so I can't assure you that they'll perform as expected when used with other styluses.

Here are some illustrations of ways that these brushes might be utilized:

- Create a new layer on top of the other layers. Paint the entire layer using some of your brushes. Then apply a blending option to create a grainy effect (overlay or soft light linear burn, multiply, etc.).
- Use the brushes to shade.
- Use the brush only on certain areas to get the grunge effect (for example, around areas around your artwork).
