**What is WhoisMatt LUTs?**

WhoisMatt LUTs refers to color grading presets or Lookup Tables (LUTs) created by the filmmaker and content creator Matt Johnson, who is often known as "WhoisMatt" on various online platforms. LUTs are used to adjust and enhance the color and tone of video footage, giving it a particular look or style.

Matt Johnson may have developed a set of LUTs that can be applied to video footage to achieve specific color grading effects or styles that are associated with his work. These LUTs can be used with video editing software to give your videos a similar look and feel to their own productions.
