CANYONS NATURE SOUNDFX is PERFECT to create a memorable experience

This exquisite collection of 135 meticulously mastered recordings of The American West, made with the latest technology, is the complete set of equipment to aid you in meeting the most stringent requirements at any time, night or day, and in windy or calm conditions. Reverberant birdsong? Check. Are coyotes singing in a haunting chorus? Check. The soft murmur of insects in the evening? Canyons is a treasure trove of exciting opportunities.

How to use audio files for project production in Sound Effects?

You can use "Boom Library CANYONS" to access this file.

Where can I download the product?

After subscription, You can download it for free from here.

Recorded by GORDON HempTON The Sound TRACKER(r)

Innovative and fascinating The CANYONS library is an SFX library of our renowned collection of high-quality recordings of nature by Emmy-winning and natural recordist Gordon Hempton. He has traveled the globe for over three decades to capture nature in its purest.

Gorgeous SOURCES FOR ABSOLUTELY Authentic AMBIENCES

Canyons feature bright reflections as well as an incredibly resonant echo which makes them an absolute Holy Grail for nature sound libraries. The secret to making use of Canyons to create enthralling soundscapes is to pay at the echoes when they disappear into endless space. They can alter and change in an unpaved corridor, only to fade away below the level of hearing.

Includes

- QP12 1449 Canyons day birds Meadowlark Magpie V3.wav
- QP12 1451 Canyons day birds Meadowlark Magpie breezy V1.wav
- QP12 1453 Canyons evening bird Spotted Towhee crickets faint V1.wav
