Unreal engine - Modular Viking Village – Medieval Town – Medieval Village – Fantasy Village v5.3:

Introducing our modular Viking village Megapack, crafted exclusively for Unreal Engine 5 (UE5), leveraging the power of Lumen and Nanite technologies to deliver stunning visuals and optimal performance. Inspired by Norse mythology, particularly the god of thunder, this Megapack offers a vast array of features to help you build ancient-themed cities and towns seamlessly.

- **UE5 Integration:** Tailored for Unreal Engine 5, the Megapack maximizes the potential of Lumen and Nanite technologies, ensuring a visually stunning and high-performance experience.
- **Massive Scale:** With 178 unique meshes at your disposal, this Megapack empowers you to create expansive ancient-themed cities and towns, bringing the rich world of Norse mythology to life.
- **Fully Modular Kit:** Enjoy the flexibility of a fully modular kit, allowing easy assembly of Viking and ancient-themed environments. Every house, tower, and dock is modular, providing creative freedom.
- **Visual FX Library:** Enhance your scenes instantly with a rich visual effects library. Included are effects like seagulls, crows, fish flocks, fish jumps, and a versatile fall leaf effect with customizable radius and color controls.
- **Massive World:** Explore, build, and play in a vast 1x1KM world that accommodates your creative vision for Viking and ancient settings.
