Blender Market - Chronos Timeline v1.0.0:

Chronos Timeline is a Blender addon designed to streamline the animation workflow by permitting customers to break down scenes into achievable body tiers. It allows the introduction and quick switching among multiple frame ranges, simplifying the animation process, and specializes in smaller sections for better management and efficiency. Chronos Timeline is a successor to Frame Ranger and is part of a suite that consists of Action Commander and Marker Manager.

Includes:

- **Frame Range Switching:** Save and transfer among multiple frame degrees for better scene control.
- **Auto Frame Range:** Automatically alter the frame range primarily based on context and settings, assisting each NLA strip and Sequencer Strips.
- **Framerate Remapping:** Remap animations among exclusive framerates whilst keeping timing and velocity.
- **Part of a Suite:** Works alongside Action Commander (for handling multiple moves in Blender) and Marker Manager (for prolonged timeline marker abilities).
- **Legacy Upgrade:** A successor to Frame Ranger, with a discount code for preceding proprietors.

Other Mentioned Addons:

- **Action Commander:** Utility device for managing more than one action and animations appropriate for sports improvement.
- **Vertex Group Plus:** Adds satisfactory-of-life capabilities for managing vertex companies.
- **Viewfinder:** Camera control device for better enterprise and previewing of a couple of cameras.
- **Bonera:** Manual rigging toolkit for dashing up rigging responsibilities.
- **Human Primitives:** Adds human base meshes and typically uses body elements as primitives.
- **Radiant:** Lighting control addon for less complicated manage of light resources in a scene.
