Artstation – Stylized Plaster Wall Tutorial – VOL 04:

Title: Creating a Stylized Wall in Substance Designer

Join us in the latest installment of our Designer Training Series as we explore a new artistic style: crafting a stylized wall with two distinct wooden textures in Substance Designer. Throughout this comprehensive tutorial series, you'll witness every step of the process, guiding you towards achieving the desired result.

Contents:

- 100 minutes of detailed, unnarrated video content
- Presented in crisp 1080 resolution

Chapters:

Chapter 01 - First Step:

- Begin your journey by creating a diverse range of surfaces for blending. Learn how to fashion bricks and tailor them to your specifications. Next, craft a plaster covering for the wall. Witness the seamless blending of these elements before incorporating a wooden structure into the design.

Chapter 02 - Second Step:

- Delve into the realm of color data and roughness for your material. Discover the art of utilizing gradient maps and sampling colors from various sources to achieve your desired aesthetic. Additionally, learn a straightforward yet effective method for generating roughness data.

Software Utilized:

Substance Designer

- Embark on this creative exploration in Substance Designer and unlock the skills needed to craft captivating stylized walls with distinct wooden textures. Whether you're a seasoned professional or new to the world of Substance Designer, this tutorial series offers invaluable insights to elevate your artistic endeavors.
