Unreal engine - Tropical Alien World v5.3: Immerse yourself in the lush landscapes of the alien tropical islands with this meticulously crafted asset designed specifically for Unreal Engine 5. Featuring two distinct maps tailored to varying needs, developers can opt for either optimized performance or stunning visual quality, depending on their project requirements.

This comprehensive asset pack comprises 38 unique meshes meticulously crafted to bring the alien tropical islands to life. With collision enabled, including automatically generated and per-poly collisions, developers can ensure seamless interaction within the environment. The vertex count is substantial, with hundreds of thousands present across the meshes, with some, notably trees, boasting millions of vertices.

Materials play a crucial role in enhancing the visual appeal of the environment, and this asset pack includes a diverse array of 35 materials and material instances. Complemented by 53 high-resolution textures, with resolutions reaching 4k, developers can expect crisp and detailed visuals throughout their projects.

Compatible with both Windows and Mac platforms, developers can seamlessly integrate these alien tropical islands into their Unreal Engine 5 projects, unlocking endless possibilities for creating immersive and captivating environments.
