

JD Looking Glass Presets: Backlight

2025-02-10 16:51:03 [label](#) [我要反馈](#) [下载页面](#)

JD Looking Glass Presets: Backlight: Instantly blend and add delicate art shades to portraits and photographs of landscapes. These presets are particularly helpful in correcting details lost in shadows, balancing underexposed photos, and bringing back the sky without lengthy exposure blends. Each preset has been meticulously calibrated to guarantee excellent skin tones for photographers shooting portraits. Begin with subtle tones and then build on your preferred tones using Toolkit's Presets (free in the bundle) to increase impact and detail. You can also make basic adjustments within Lightroom and Adobe Camera Raw.

Gfx plugin details of JD Looking Glass Presets: Backlight

The product is in the **Lightroom category** , for more information about this post you can click on the home page link in the sidebar.

Every Looking Glass Set includes presets for BOTH Lightroom and Adobe Camera Raw, as and actions to use inside Photoshop Creative Cloud and Lightroom Mobile, allowing users to utilize various applications. Because these programs operate differently, specific presets/actions can be located in different locations. See the table below. All adjustments to tones and toolkits are consistent from one application to application (for instance, the tones and contrasts in "Antique" look the same in LR, ACR, and Photoshop). Note that these actions can only be used with Photoshop CC if you first install the ACR presets.
