Aescripts Rubberize It v1.09 for After Effects (Win, Mac)

2025-02-10 16:48:17   label 我要反馈   下载页面

Switch any Coating to Plastic, Rubber, or Goop in Minutes. Reacts Obviously to movement without keyframes. It depends on the sort of physics they are taught in college!

Rubberize It!

Rubberize It! It is a remarkably Simple way to Create your cartoon skillet and stretch like rubber. It works together with kinds, stills, movies, contours, vectors, and some other coating that may accommodate puppet hooks.

Just Set the pins in your Coating, choose a substance, and click on Rubberize! It is that simple. Once set in motion, the coating will act like it was made from plastic, rubber, goop, or even five additional bendy options.

Rubberize It works by displacing puppet Pins predicated on a coating's speed so that adjustments in its place, scale, or rotation will automatically activate a response. It works with moves inherited from a parent layer.

The UI is designed to apply changes Fast and easily and provides a quick learning curve.
