

Microservices Communication in ASP.NET Core 3 - Gill Cleeren

2025-03-27 20:47:14 [label](#) [我要反馈](#) [下载页面](#)

This course, "**Microservices Communication in ASP.NET Core 3 - Gill Cleeren**", offers a comprehensive guide to architecting a microservice-based application within the .NET framework. Throughout the program, you'll delve into the intricacies of organizing communication among various microservices and coordinating interactions with diverse front-end components.

You'll start by establishing synchronous communication pathways between different services before exploring the asynchronous approach using a service bus. Additionally, you'll master the creation of a backend-for-frontend (BFF) and the implementation of the API Gateway pattern to seamlessly integrate distinct application front-ends.

By the end of , you'll possess the expertise needed to construct a robust microservices architecture with ASP.NET Core, equipped with the skills to facilitate resilient communication between services.

Microservices Communication in ASP.NET Core 3 Table of contents:

1. Course Overview (Duration: 2 minutes)
2. Introducing Microservice Communication in ASP.NET Core (Duration: 19 minutes)
3. Creating Synchronous Communication between ASP.NET Core Microservices (Duration: 58 minutes)
4. Setting up Asynchronous Communication between ASP.NET Core Microservices (Duration: 66 minutes)
5. Making Microservices More Resilient (Duration: 24 minutes)
6. Accessing a Microservices Infrastructure (Duration: 25 minutes)
