Unreal engine - Modular Legendary Forge v5.0:

The modular Legendary Forge for medieval or fantasy environments is optimized for games, offering a comprehensive range of assets from large props like mountains to smaller items like mugs, allowing you to construct your own forge setting with ease.

Featuring 106 high-quality meshes, including tools, weapons, lava, rocks, and modular architecture designed to align with grid systems for simplified construction. The lava implementation utilizes edge detection through distance fields for realistic effects. Additionally, the package includes a particle system created using Niagara, offering effects such as birds, fog, snow, and smoke.

The environment seamlessly transitions between indoor and outdoor spaces, with mountains serving as vista points and snow automatically applied to the top of meshes for added realism. Material instances are provided for easy asset customization, along with damage decals for enhancing visual detail.

- 106 high-quality meshes
- Lava with distance field edge detection
- Particle effects using Niagara
- Indoor and outdoor environment elements
- Mountain vista props
- Automatic snow application on meshes
- Material instances for easy customization
- Damage decals for added realism

Technical Details:

- Collision: Automatically generated, with some meshes set to complex for detailed structures like stairs
- LODs: Included for optimized performance
- Materials and Material Instances: 12 Materials and 58 Material Instances
- Textures: 130 textures available in 2k and 4k resolutions
- Compatibility: Supported on both Windows and Mac platforms
